Nature Magazine

# annual index 1977

Published by The National Wildlife Federation, 1412 16th St. NW, Washington, DC 20036

*Hi, Rangers!* Here is your index for 1977. Pull it out carefully and keep it with the 1977 issues of my magazine. You can use it to answer your nature questions, to find information for school reports, or just to find a favorite story. The subjects are listed in alphabetical order. They are followed by the month and page number, or front or back cover (fr. cov. or bk. cov.), where you can learn about each subject. Pay special attention to the page numbers in color—that's where you will find major articles. Poems, crafts and activities, and games and puzzles are listed separately at the end of the index. I hope you'll find answers to all your questions!! *R.R.*
